An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following election of species is required:

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Each polymer, such as amylose tris [(S) - phenylethylcarbamate], is considered to be a distinct species.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 1 is considered to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species is patentably distinct from each other species.

During a telephone conversation with Terryence F. Chapman on March 26, 2008 an election was made to prosecute the species, amylose tris [(S) - phenylethylcarbamate].

In claim 1, lines 2, after, comprising, - - amylose tris [(S) - phenylethylcarbamate] - - has been inserted.

Claims 4-10, 12, and 13, drawn to non-elected species and inventions, have been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Terryence F. Chapman on March 26, 2008.

Prior to the first line of the first page of the specification, the following has been inserted:
